NMT Training Certification Phase I: 2023 Virtual Boot Camp**

NMT Training Certification: Brief Overview

The Neurosequential Model of Therapeutics (NMT) is a neurodevelopmentally informed, biologically respectful perspective on human development and functioning and is used in the clinical problem-solving process. NMT Training Certification is a training process meant to certify exposure to and participation in training activities. This training is a clinical enhancement, capacity building project providing exposure to core concepts underlying the NMT and to the clinical applications of this approach. The primary focus of Phase I training is to build comfort with, and experience in, organizing clinical information in a neurodevelopmentally-informed way; a primary objective of Certification is to develop competence with the web-based NMT Clinical Practice Tools (the NMT Metrics which yields Brain Maps). Participants are provided multiple opportunities to see multidisciplinary clinical problem solving using the NMT approach in many case-based staffings that are part of the learning process.

The majority of NMT Training Certification is conducted via distance learning using web-archived materials that allow participants to work through the content in a self-paced and self-scheduled manner. The format is incredibly convenient. While this flexibility is truly welcomed, many professionals appreciate interactive opportunities to connect with their fellow NMT learners and practitioners. NMT Boot Camp provides this face-to-face learning experience.

NMT Training Certification – Phase I Boot Camp: Virtual Model 2023

The Neurosequential Network is pleased to offer a Boot Camp for our NMT Training Certification - Phase I Program on **Tuesday, April 18, 2023 (full day)** and **Tuesday, April 25, 2023 (afternoon only)**. This Boot Camp will be a **live, virtual-learning experience** led by Diane Vines, Director of NMT; Michelle Maikoetter, Director of Special Projects; and NMT Mentors.

Please note that participants must plan to attend for the full online time commitment (both days) and must secure bring their own computers and high-speed internet connection to participate.

NMT Training Certification – Phase I Curriculum:

The Neurosequential Network's NMT Training Certification Program combines live and self-directed learning opportunities in Phase I. Phase I Training is organized into 10 “modules”, and a provided training guide articulates all required activities for each module. Participants typically spend one year systematically working through the content. Required curricular elements are outlined briefly below:

1. Multimedia Content:

NMN Multimedia content (video content, recorded presentations, NMN YouTube Channel Seven Slide Series sessions, etc.) according to training syllabus.

2. Readings

Syllabus professional articles and chapters as well as guided reading of Dr. Perry's book *What Happened to You? and The Boy Who Was Raised as a Dog* (participants must provide their own copies of books)

3. NMT Core Certification Series Recordings

View 10 Case-based training sessions according to syllabus. 90-minutes each.

4. Case-based Seminars: Recordings of NMT Mentor-led Case-based Training Series

1) View 10 sessions of 2021 Series Case Discussions. 90-minutes each.

5. Learning Community Discussions and Study Group Participation

Participation in bi-monthly, 1-hour Study Group calls led by NMT Trainers and Mentors.

6. NMT Online Clinical Practice Tools (aka the NMT Metrics or Brain Maps)

Access to and ample practice with NMT Online Clinical Practice Tools to allow each participant to become familiar with the NMT metrics. Also, participation in Metric Tool Scoring calls and participate in bi-annual Fidelity Exercises.

The NMT Phase I Boot Camp is a terrific way for participants to jump-start their Certification process and provides clinicians with opportunities for in-person learning and relationship-building. Following Boot Camp, participants will continue Phase I training and be assigned to a Study Group that will meet virtually twice per month to review and discuss each module.

Once Phase I Training is completed, clinicians join a worldwide network of NMT Trained providers who share best practices on an ongoing basis and may elect to move on to Phase II/Train-the-Trainer (TTT) directly or enrol in the Maintenance Phase.

Cost:

The total registration cost for this NMT Phase I Boot Camp including the full NMT Training Certification - Phase I Program and materials is \$4500 USD. An initial payment of \$2250 USD is due upon enrolment, with the remaining balance of \$2250 USD due within six months, or a single payment of \$4,500 USD can be made upfront.

Registration cost INCLUDES

- Your full NMT Phase I Boot Camp Program
- Your full enrollment in the NMT Training Certification - Phase I Program including materials (Participants must supply their own copy of Dr. Perry's books *The Boy Who Was Raised as a Dog* and *What Happened to You?* – not needed for Boot Camp)

We look forward to this unique training experience and are happy to answer any/all questions. Please contact Jana Rosenfelt, M.Ed. for more information at 281-932-1375 or JLR@neurosequential.com
